SUMMARY

Full Stack Web Developer with strong experience in building scalable web applications using JavaScript, Node.js, and React. Possess foundational knowledge in machine learning, including data analysis and model building using Python libraries such as NumPy, Pandas, and Scikit-learn. Passionate about integrating intelligent features into real-world applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Web Technologies:** HTML, CSS, React.js, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub
- **Machine Learning Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib

EXPERIENCE

BIHAR INDUSTRIAL AREA DEVELOPMENT AUTHORITY (BIADA)

Role : Software Development Intern

Tech Stack: Odoo 19, Python, PostgreSQL, XML, JavaScript

- Customized the Odoo CRM for BIADA's Investor Promotion workflow by developing new modules and extending existing ERP functionality.
- Built modules for Investor Registration, Lead Management, Opportunity Tracking, Industrial Area, Plot, Shed, and Administrative Record Management.
- Developed custom models, views, actions, menus, and access control using Odoo framework.
- Implemented business workflows including plot allocation, investor inquiry management, approval processes, and data validation.
- Used PostgreSQL with Odoo ORM to manage relational data and optimize business operations.
- Participated in requirement analysis, module customization, testing, and debugging as part of the BIADA IT development team.

IEEE Student Branch, Amity University Patna

Webmaster | 2024 – Present

- Developed and maintained the official IEEE Student Branch website using HTML, CSS, JavaScript, and React.js.
- Managed website updates, resolved technical issues, and ensured a responsive user experience.
- Collaborated with the IEEE committee using Git and GitHub for version control and website maintenance.

PROJECTS

Project Camp Backend – Secure Project Management REST API

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Multer, Nodemailer, REST API, RBAC

- Developed a backend-only project management system using Node.js, Express.js, and MongoDB with RESTful APIs for project, task, subtask, and note management.
- Implemented secure authentication using JWT with refresh tokens, email verification, and password reset functionality.
- Designed role-based access control (RBAC) supporting Admin, Project Admin, and Member roles for controlled resource access.
- Built 30+ API endpoints for project creation, task assignment, team management, status tracking, and notes handling.
- Integrated file upload feature using Multer for task attachments and added validation and security middleware.
- Structured the application using MVC architecture for scalability and maintainability.

Home Rental System – Full Stack Rental Listing Platform

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Multer, REST API, EJS, Bootstrap

- Developed a full-stack rental listing platform enabling users to browse, post, and manage property listings with image uploads.
- Implemented secure **authentication and authorization** for user signup/login, profile management, and personalized dashboards.
- Built **CRUD operations** for rental properties with image handling using **Multer** and **Cloudinary**.
- Structured the application using **MVC architecture**, server-side validation, and session management.
- Optimized data storage and retrieval using **MongoDB** and **Mongoose**.
